The Polyclinic dermatology group offers cosmetic skin care treatments performed by Licensed Clinical Aestheticians at our Madison Center and Downtown locations. These treatments can be done on their own or in coordination with medical dermatology skin care.

Aestheticians services at The Polyclinic include: skincare consultations, IPL treatments, chemical peels, treatment of vascular lesions, laser hair removal, and other cosmetic laser treatments. Services vary by location.

Aesthetician Services

All services require 24-hour advance cancellation or you will be billed for scheduled services. Prices for services described in this brochure may vary and are subject to change. We recommend patients confirm pricing at the time services are scheduled.

Skin Care Consultations
Polyclinic aesthetics offers advanced clinical skincare procedures and physician-strength skincare products to address a myriad of individual skin types and concerns. Oxidative damage due to UV radiation, environmental, and internal stressors can be prevented, counteracted, and repaired with evidence-based, customized treatment plans and home care regimens.

Working alongside Polyclinic dermatologists, the aesthetician team at The Polyclinic will consult and develop the right plan for you.

**IPL (Intense Pulsed Light)**
*From $250 and up*

The IPL treatment improves the appearance of photoaged skin, removes age spots (sun-induced freckles), most benign brown pigments, and redness caused by broken capillaries and rosacea through a process called photorejuvenation. It is different than a regular laser treatment in that it uses many wavelengths of light with specific filters to target substances in the skin. Typical laser treatments generally use only one wavelength and target a single chromophore.

The IPL is one of our most popular treatment options for non-ablative skin resurfacing. Treatments can be performed on the face, neck, chest or hands—anywhere that sun damage shows.

The process is ideal for patients with active lifestyles because the procedure requires no downtime and has a low risk of side effects.

**Chemical Peels**
*From $100-$700*

The Polyclinic offers uniquely formulated, high-tech peels that produce results with minimal pain and downtime. We use the latest clinical data and formulators to go beyond traditional peeling solutions and into next-generation skincare. Peels can be specifically created to treat:

- Brown spots
- Fine lines
- Tired-looking skin
- Uneven texture
- Enlarged pores
- Acne & Acne scarring

We combat these skin issues with “intelligent acids,” such as Melanage, Perfect Peel, and VI.

Chemical peels can be used on all skin types and ethnicities to eliminate signs of aging, discoloration, acne and sun damage. Dramatic results may be seen after just a single treatment, through you may experience 3-5 days of peeling.

**Fractionated CO2**
*From $1200, varies consult your provider*

This is one of the most dramatic laser treatments we offer. It works to resurface wrinkles, sun damage, surgical and acne scarring. It helps to grow new skin cells and stimulate collagen in the skin, offering maximum results with minimal recovery time.

**V-Beam**
*From $150, varies consult your provider*

The V-Beam laser eliminates virtually all vascular lesions, including leg vessels and angiomas, and corrects discoloration such as Roseacea.

**Laser Hair Removal**
*From $75, varies depending on location*

The LightSheer Duet laser offers high-speed permanent hair reduction with maximum comfort. It pulses for a fraction of a second, heating up hair follicles and impeding their ability to regrow. Hair can be removed from nearly anywhere on the body. Back, chest, shoulder, underarm, beard, chin, legs and bikini are several popular areas for laser hair removal. Laser hair removal requires multiple treatments and can be used by all skin types.

**Other Skincare Services**
*From $135*

DermaSweep is a new and improved take on traditional micro-dermabrasion. It features a closed vacuum system which allows for the gentle lifting of the skin surface as the device “sweeps away” the dead skin layer resulting in a deeper peel and polish of your skin. The DermaSweep procedure is painless and can be performed without any downtime.

The Polyclinic also offers customized facials for overall beauty and to target a variety of skincare needs.
